

Twin-Bag®

Twin-Bag® is a bag developed by NNZ with the sides made from two different materials. One side is made from CLAF® and the other from PE film. This gives the Twin-Bag® the advantages of both a net and a film, excellent ventilation whilst providing the best possible presentation for potatoes, vegetables and fruit. The Twin-Bag® can be supplied

on a wicket and on rolls. CLAF® is almost as thin as PE film, so that nearly as many Twin-Bags fit on one wicket / roll as film bags. The Twin-Bag® can be supplied in a variety of different colour combinations. The film side can be printed in up to 8 colours. NNZ can print and supply the Twin-Bag® to your own specifications.
